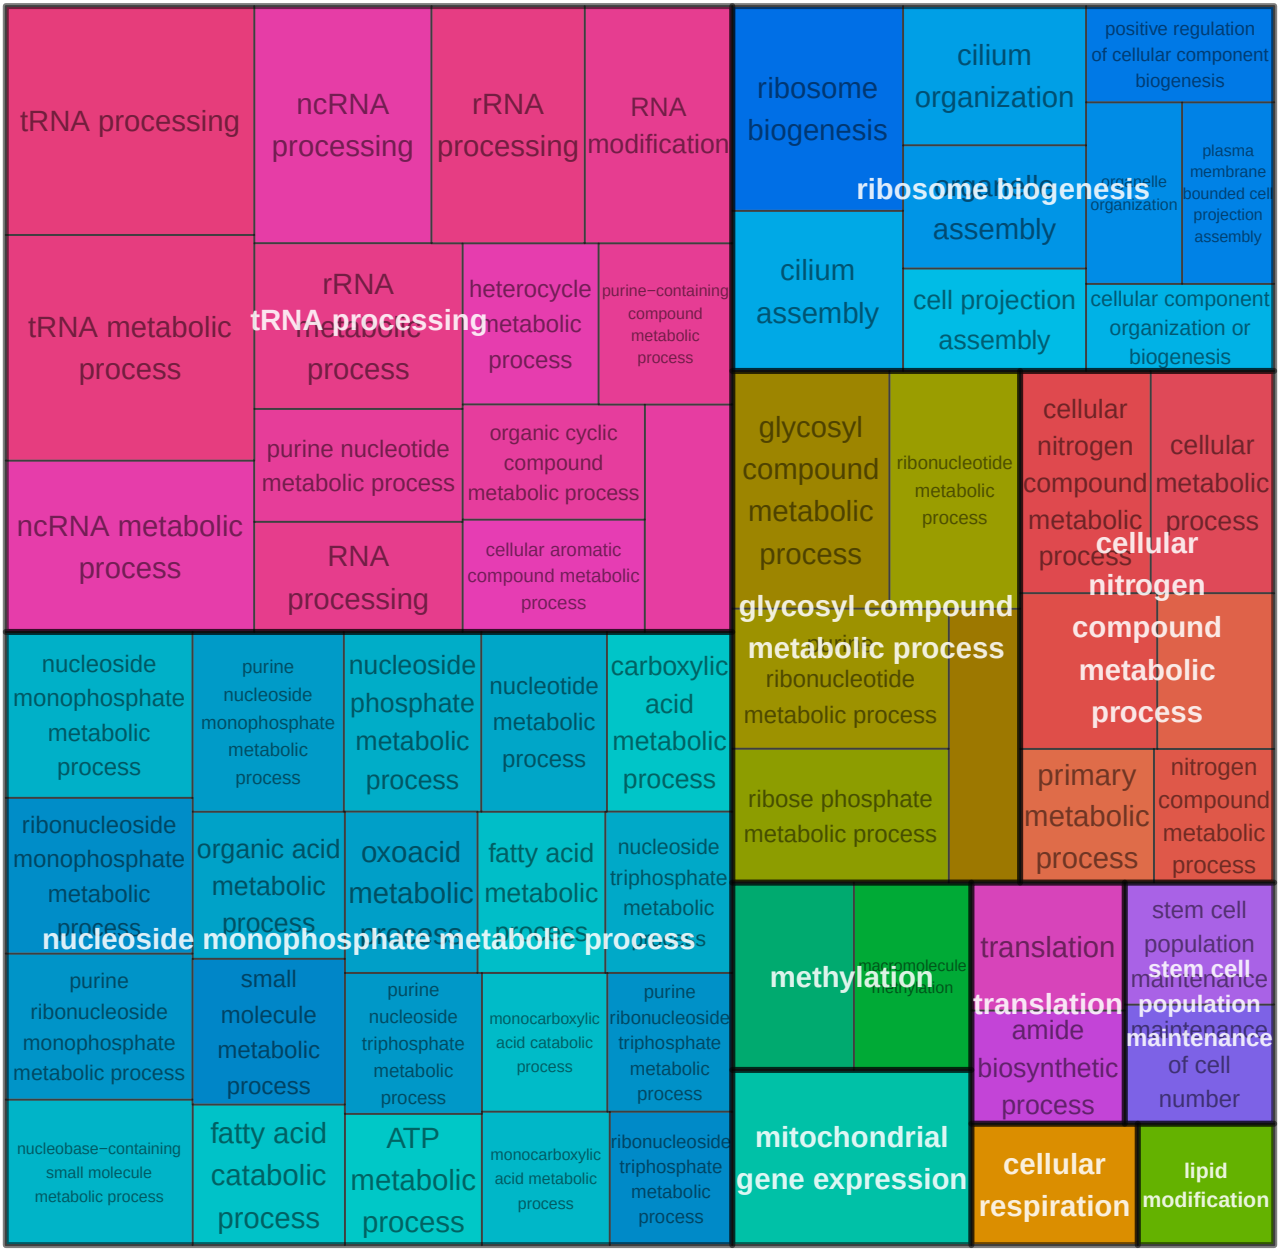
# C2



tRNA processing
ncRNA processing
rRNA processing
RNA modification
tRNA metabolic process
rRNA metabolic process
heterocycle metabolic process
purine−containing compound metabolic process
tRNA processing
purine nucleotide metabolic process
organic cyclic compound metabolic process
ncRNA metabolic process
RNA processing
cellular aromatic compound metabolic process
ribosome biogenesis
cilium organization
positive regulation of cellular component biogenesis
ribosome biogenesis
ribosomal subunit organization
plasma membrane bounded cell projection assembly
cilium assembly
cilium assembly
cell projection assembly
cellular component organization or biogenesis
glycosyl compound metabolic process
ribonucleotide metabolic process
cellular nitrogen compound metabolic process
cellular metabolic process
glycosyl compound metabolic process
cellular nitrogen compound metabolic process
ribonucleotide metabolic process
primary metabolic process
nitrogen compound metabolic process
ribose phosphate metabolic process
nucleoside monophosphate metabolic process
purine nucleoside monophosphate metabolic process
nucleoside phosphate metabolic process
nucleotide metabolic process
carboxylic acid metabolic process
ribonucleoside monophosphate metabolic process
organic acid metabolic process
oxoacid metabolic process
fatty acid metabolic process
nucleoside triphosphate metabolic process
nucleoside monophosphate metabolic process
methylation
macromolecule methylation
translation
stem cell population maintenance
translation
stem cell population maintenance
purine ribonucleoside monophosphate metabolic process
small molecule metabolic process
purine nucleoside triphosphate metabolic process
monocarboxylic acid catabolic process
purine ribonucleoside triphosphate metabolic process
amide biosynthetic process
of cell number
nucleobase−containing small molecule metabolic process
fatty acid catabolic process
ATP metabolic process
monocarboxylic acid metabolic process
ribonucleoside triphosphate metabolic process
mitochondrial gene expression
cellular respiration
lipid modification
